PROFESSIONAL SUMMARY

CS undergraduate skilled in **DSA**, **AI**, and **Full Stack Development**; builds and ships production web apps with React, Next.js, TypeScript, and cloud services.

EDUCATIONAL QUALIFICATIONS

The LNM Institute of Information Technology (LNMIIT)

Bachelor of Technology in Computer Science and Engineering

Jaipur, Rajasthan

August 2023 – May 2027

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL, HTML, CSS

Coursework / Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Low-Level Design

Frameworks: ReactJS, NodeJS, ExpressJS, NextJS

Libraries & Tools: C++ STL, Zustand, Redux, Zod, Docker, NextAuth, Nuqs, Leaflet, ShadCN, Framer Motion

Developer Tools: GitHub, Bitbucket, Postman, MongoDB Compass, Netlify, Jira, Figma, APIs

Cloud & DevOps: AWS (EC2, S3, RDS, Route53, Cognito, IAM, CI/CD), Docker

WORK EXPERIENCE

AI and Full Stack Intern

June 2026 – Present

Kritu Capitals — Typescript, ReactJS, NodeJS, ExpressJS, MongoDB, PostgreSQL, AWS

Remote

- Built and shipped **4+ full-stack features** (company workspace, compliance views, review/adjustments flow, document OCR path) for a **multi-region audit platform** covering 3 jurisdictions (USA, Canada, India) using React, TypeScript, Node.js/Express, and PostgreSQL.
- Designed and implemented a **REST adjustments API** (4 endpoints: create, list, status update, delete) and migrated manual review entries from browser-only storage to **server-side persistence**, improving cross-session reliability for auditors.
- Integrated a **third-party OCR pipeline** for document text extraction with clear error handling and env-based configuration, supporting image + multi-page PDF uploads and human-reviewable structured outputs.
- Improved product reliability by fixing empty-state/listing bugs and wiring **end-to-end UI → API → DB flows**, contributing to a **50+ screen** auditor/client workspace with role-based navigation and faster, more consistent dashboard behavior.

Full Stack Intern

May 2025 – July 2025

Aikav Technologies — Typescript, ReactJS, Next.js, Node.js, Jira, Agile | [Completion Certificate](#)

Remote

- Developed **responsive, high-performance web interfaces** using Next.js, TypeScript and Tailwind CSS.
- Architected **dynamic frontend components** and managed state transitions using React.js and modern hooks.
- Implemented robust backend logic, focusing on **RESTful API integration** and PostgreSQL database connectivity.
- Streamlined collaborative workflows and version control using Git/GitHub within an Agile-based SDLC.
- Optimized **cross-device compatibility** & user experience through mobile-first, responsive UI design principles.

PROJECTS

Mockview | Typescript, Next.js 16, ReactJS, NodeJS, PostgreSQL, Gemini 2.5 Flash, Prisma | [Github](#) | [Live](#)

- Engineered and deployed **MockView AI**, a full-stack AI mock interview platform on Vercel using Next.js 16, React 19, TypeScript, Prisma, and Supabase PostgreSQL, with **NextAuth authentication** and **14+ REST API routes** powering interview, resume, and dashboard workflows.
- Built **real-time voice interview sessions** with Web Speech API (speech-to-text/text-to-speech) and **streaming responses** from Google Gemini 2.5 Flash via the Vercel AI SDK, supporting **3 interview types** (behavioral, technical, system design) and **3 difficulty levels**, plus optional resume-personalized questioning.
- Implemented **AI-driven performance evaluation** scoring candidates **0–100** across **4 weighted dimensions** — Communication (25%), Technical (30%), Problem Solving (25%), and Confidence (20%) — with actionable coach tips, transcript review, and STAR-method answer rewriting.
- Developed an **ATS resume analyzer** that parses PDFs, returns a **0–100 ATS score**, evaluates **6 resume sections**, flags **10–15 role-critical keywords**, and surfaces **4–8 prioritized improvements**, integrated with a progress dashboard tracking streaks, goals, and historical interview metrics.

RoadGuard | ReactJS, TypeScript, Vite, NodeJS, ExpressJS, PostgreSQL, Leaflet, Zustand, i18n | [Github](#)

- Engineered a full-stack web app for **real-time workshop management** and service requests, supporting **3 user roles** (manager, mechanic, customer) with **15+ API endpoints**. Added a robust authentication system using JWT, **Role Based Access Control** and OTP verification using email.
- Integrated **Cloudinary** for image management and **Leaflet** for interactive maps with geolocation services, while implementing **i18n** for multilingual support, enhancing accessibility across **25+ React components**.
- Built a modular, maintainable codebase with Zustand, **10+ custom React hooks**, and scalable REST APIs across **8 database models**, while enforcing code quality via ESLint, TypeScript strictness, enabling rapid development.

ACHIEVEMENTS

- Solved more than **500** problems across different platforms in Data Structures and Algorithms.
